The Danish producer of

# Autoclaves

FOOD INDUSTRY • PHARMACEUTICAL & TECHNOLOGY INDUSTRIES

**KEA**  
PHØNIX

## Autoclaves | types

**KEA PHØNIX** produces and provides the full range of autoclaves used in the international food industry for sterilisation of products packed in tins, bottles, plastic containers, etc.

**KEA PHØNIX** autoclaves are also used in the international pharmaceutical and technology industries.

**KEA PHØNIX** provides the following types of autoclaves in both black and stainless steel, in standard dimensions and customised models.

- Water spray autoclaves/rotoclaves
- Full water autoclaves/rotoclaves
- Steam autoclaves/rotoclaves
- Vertical autoclaves

## Autoclaves | accessories

**KEA PHØNIX** offers to deliver the following customised autoclave accessories:

- Baskets, trolleys and perforated spacers
- Chain conveyor
- Mounting of heat exchanger and cooling tower

## KEA PHØNIX also offers to provide

- Refurbishment/upgrading of existing autoclaves
- Modernisation of process control systems
- Regular service, maintenance and periodic inspections

## Autoclaves | process control systems

Future demands to product sterilisation are increasingly moving towards more accurate control of the temperature, pressure and time requirement of the autoclave.

Today's **KEA PHØNIX** autoclaves are delivered with high-tech process control systems integral with several programs allowing for follow-up and documentation.

**KEA PHØNIX** specialises in developing customised process control systems that are created in consultation with the customer.

## KEA PHØNIX - a Danish producer of world-class autoclaves

### More than just a supplier...

At **KEA PHØNIX** we believe in long-term relationships and this is the platform of our business concept. In order to live up to customer requirements at all times, we place particular focus on four core areas:

### Know how

**KEA PHØNIX** relies on more than 50 years of experience designing, developing and producing individualised solutions for autoclaves employed in the food industry and the pharmaceutical and techno-chemical industries.

### Quality

**KEA PHØNIX** is synonymous with hard-wearing and reliable autoclaves. Our list of references counts satisfied customers from Denmark as well as many other countries all over the world.

### Flexibility

With our highly flexible approach, **KEA PHØNIX** offers to produce autoclaves tailor-made to suit customer needs. We design, develop and produce solutions dedicated to the specific production requirements of our customers

### Service

In relation to **KEA PHØNIX** autoclaves, we offer an extensive service scheme, not only in connection with commissioning but also regular service, maintenance and upgrading of the process control systems.

Characteristic of **KEA PHØNIX** autoclaves is the high quality. These autoclaves also provide large energy and water savings while at the same time featuring a construction as simple as at all possible.

**KEA PHØNIX** boasts more than 50 years of experience designing, developing and producing autoclaves and is today renowned as the Danish, reliable supplier of autoclaves.
